THIPS RETURNING from other missions, are bringing natural soda from Chile-for this year's biggest of all food production jobs. It is soda you know all aboutcan store and handle easily-can depend on for top and side dressing. How much will there be? That's hard to say, but last year Chile sent 1,000,000 tons to U. S. farmers and think what that would mean this year.

• Properly applied, 1,000,000 tons of Chilean Nitrate would produce 250,000,000 bu. of oats or 100,000,000 bu. of wheat; 125,000,000 bu. of corn or 4,800,000 tons of forage crops; 6,000,000 tons of vegetables or 2,500,000 bales of cotton and 1,100,000 tons of cotton seed.

Natural Chilean Nitrate, always a big factor in food production, is absolutely vital this year-enough and in time for all essential needs.

To stand by his convictions concerning this innocent person would have greatly inconvenienced him in many ways. So "wishing to content the multitude" he delivered Jesus to be scourged and crucified. Men and women today are willing to condemn Christ anew because o submit to Him and bear His name would require of them a sacrificial living which they are not willing to give.
